Series GK
MAGNETIC DRIVE GEAR PUMP

Series GK pumps deliver exceptional pumping performance for any high-precision application. These compact magnetically driven gear pumps feature a cavity style design with benefits such as chemical resistance, smooth, pulseless delivery, and high-system pressure capability. Available in standard and OEM configurations, Micropump’s Series GK pumps are ideal for a variety of fluid handling applications.

CAVITY STYLE PUMPS
Cavity style pumps are excellent for wide-ranging inlet and outlet operating conditions, and allow for intermittently pumping in reverse.

SMALL SIZE
The miniature package size of the Series GK is easily incorporated into the design of many systems.

FLUID PATH INTEGRITY
The magnetic drive and static o-ring seal(s) keep the fluid securely inside the pump and potential contaminants out.

SMOOTH PULSELESS DELIVERY
Positive displacement, precision gears provide consistent fluid delivery in continuous processes.

CHEMICALLY RESISTANT
Series GK has a long–life in aggressive environments.

EASY TO SERVICE
Series GK pumps are easy to service using a Micropump service kit and simple hand tools.

HIGH-SYSTEM PRESSURE CAPABILITY
Optional versions of the Series GK are designed to withstand system pressures up to 103 Bar (1500 psi).
